

Title

High Performance Computing Research in Europe

Abstract

Over the last years, through a number of policy and research initiatives, the European Union has worked in putting together an ambitious high-performance computing research programme. The talk will provide a detailed overview of the European high-performance computing research programme, its current status, and its future perspectives.

Short Vita

Dr. Panagiotis (Panos) Tsarchopoulos is responsible for microprocessor and high-performance computing technologies at the "Competitive Electronics Industry" unit of the European Commission. He holds a PhD in computer engineering from the University of Kaiserslautern, Germany and an MBA from the UBI, Brussels, Belgium.
